Game Developer Summary

Passionate Game Developer with a 2:1 in Games Programming from DeMontfort University. Proven expertise in Unity, C#, and C++ demonstrated through complex projects, including an immersive VR experience and a custom OpenGL graphics engine. Seeking to apply technical and creative skills to build engaging and high-quality gameplay systems.

EXPERIENCE

Web Content and Data Coordinator

Dadlidirectory

November 2023 - Present, Antigua

- Engineered a comprehensive full-stack solution to streamline business operations, halving manual data entry efforts.
- Utilized Javascript and PHP to create advanced backend functionalities, enhancing digital interaction for a diverse clientele.
- Developed impactful websites leveraging Wordpress and HTML5/CSS, contributing to a 30% uptick in brand recognition.

Graphic designer

Antigua Charter Yacht Show

November 2023 -December 2023, Antigua

- Designed and created marketing materials and digital media campaigns that adhered to the organization's brand identity.
- Utilized Photoshop and Canva to create logos and digital graphics for web, print, and social media, resulting in a 30% improvement in client engagement.

PROJECTS

CarniVRal

University • <https://malz414.github.io/porto/projects.html> • November 2021 - July 2022

- Developed a standout virtual reality project in Unity during my university finals, which garnered recognition for its exceptional quality.
- Utilized Unity XR interaction manager to design an immersive VR environment complete with interactive elements and engaging games.
- Recorded and meticulously edited sound effects to ensure a seamless and immersive user experience.

Graphics Program

University • <https://malz414.github.io/porto/projects.html> • February 2022 - June 2022

- Crafted a sophisticated graphics program utilizing OpenGL, adeptly integrating advanced techniques such as texture mapping with parallax and normal mapping.
- Implemented a range of features including random terrain generation, tessellation, and fog to enrich the visual experience.
- Seamlessly integrated post-processing effects like blur and bloom to elevate the overall visual quality and immersion.

Movie Recommender (CS50 Project)

- Developed a Flask app that utilizes data scraping and facial recognition to give users movie recommendations based on their mood.
